# SUNY Cortland Teacher Certification Exam Pass-Rates

All graduates of teacher preparation programs must pass a state or national teacher certification exam in order to be granted Provisional Certification in Teacher Education to teach in New York and most other states. The following table presents the pass rates by 1999-2000 SUNY Cortland graduates on the New York State Teacher Certification Examination (NYSTCE) and the National Teacher Exams (NTE).

**Professional Knowledge/Pedagogy** is assessed by the NYSTCE Assessment of Teaching Skills-Written (ATS-W) or the NTE Professional Knowledge Exam (PK).

**Content Knowledge** is assessed by the NYSTCE Liberal Arts and Sciences Test (LAST) or the NTE Communication Skills and General Knowledge (CS & GK) test.

SUNY Cortland's pass rates for these exams are among the highest in New York. Cortland graduates more students in teacher education programs — 662 in 1999-2000 — than any other college or university in the state. Cortland is second in the entire Middle States region in granting teacher education degrees (Source: National Center for Education Statistics, 2000 Completions Survey).

SUNY Cortland has the largest comprehensive teacher education program in New York and the 10th largest among public institutions in the United States (Source: National Center for Education Statistics, 2000 Completions Survey). The exceptional pass rates by Cortland graduates on the state and national certification exams demonstrates that the College has maintained the highest standards

while attracting large numbers of students to its outstanding teacher education programs.

The College's traditional programs in childhood and physical education are long standing and highly recognized throughout the nation. Through its conceptual framework and placement of student teachers, SUNY Cortland is committed to preparing teachers to meet statewide demands within urban and rural areas.

SUNY Cortland's Education Department faculty includes a leading national expert on character education, Thomas Lickona, who directs the campus-based Center for 4th and 5th Rs (Respect and Responsibility). For the past five years, the Center has offered Character Education Institutes to teams of school personnel from across the United States.

Within SUNY, Cortland is the only college or university which provides disabilities education in five distinct areas: therapeutic recreation, special education, speech pathology and audiology, adapted physical education, and psychology of exceptionality (Attention Deficit Disorder/Attention Deficit Hyperactive Disorder). The College has started the groundwork for an Institute of Disabilities Studies to better infuse this area of study into its teacher education programs.

SUNY Cortland supports the third largest Migrant Educational Outreach Program in New York which provides educational, health and social services advocacy and support to school-aged children of Migrant workers and their families in the schools, after school, at their homes and in the camps.

Test Field/Category	SUNY Cortland			Statewide
	NUMBER TESTED	NUMBER PASSED	PASS RATE	PASS RATE
PROFESSIONAL KNOWLEDGE/PEDAGOGY ATS-W (or NTE)	591	580	98%	97%
OTHER CONTENT AREAS LAST (or NTE)	593	579	98%	96%

*These data are presented in compliance with Section 207 of the Higher Education Act Title II. Program completers in this table are defined as graduates receiving a degree between July 1, 1999 and June 30, 2000 and who have taken the NYSTCE or NTE exams. While most of our students take one of these exams, it is not a degree requirement at SUNY Cortland.*

# State University of New York

## The University Today

State University of New York (SUNY) today is a modern public university — a unified statewide system of 64 campuses enrolling around 367,000 students — the largest single, most diverse multi-campus university in the nation, meeting the needs of an increasingly diverse population. The University proudly counts more than 1.9 million alumni.

SUNY is a community of learning and inquiry. From “full opportunity” campuses providing access to higher education to extremely selective and competitive programs rivaling the best in America — all within hours of virtually every New Yorker.

The varied missions of its campuses underscore the wide range of educational diversity and promise found in SUNY’s classrooms and lecture halls. Almost every field of academic or professional study is offered somewhere within the system — more than 5,180 programs of study overall.

## The Campuses

Research and advanced graduate and professional studies are conducted primarily through the four University Centers at Albany, Binghamton, Buffalo and Stony Brook.

Recognized nationally for their quality undergraduate instruction, SUNY’s 13 University Colleges conduct programs of academic study through the master’s degree in a wide range of liberal arts and professional disciplines.

State University offers courses of study in medicine, optometry, dentistry, pharmacy, nursing, social work and the allied professions to almost 17,000 students through 279 health science education programs spread across its 64 campuses.

SUNY’s Specialized Colleges include the College of Environmental Science and Forestry, offering undergraduate upper division and graduate work leading to degree opportunities through the doctorate; the Maritime College, preparing young men and women to become licensed officers in the American Merchant Marine; the College of Optometry, producing professional optometric practitioners; the Institute of Technology at Utica/Rome, which provides upper division technology programs for transfer students and two-year college graduates; and SUNY Farmingdale, which offers a wide variety of two- and four-year degrees in engineering, technologies, liberal arts and sciences, and business and computer science.

The University’s five Statutory Colleges are located on the campuses of two private universities and offer a number of specializations leading to bachelor’s, master’s and doctoral degrees.

SUNY’s five Colleges of Technology have responded to societal change by developing new and innovative programs in public and human services as well as high-tech offerings. Colleges of Technology are located at Alfred, Canton, and Delhi. Campuses at Cobleskill, and Morrisville.

The 30 locally sponsored Community Colleges under the program of State University of New York are the major entry point to the University for more than half of SUNY’s student body. In the forefront of efforts to meet the accelerating pace of technological developments and the requirements of continuing educational opportunity for all citizens, they play a pivotal role in training and retraining the state’s work force.

## The Students

SUNY today means unprecedented promise for diverse student

populations, those academically well-prepared and those less so, to take advantage of the opportunities that education can provide to improve their lives and the larger society. Approximately 36.6 percent of SUNY’s students are 25 years of age or older, reflecting the University’s commitment to continuing education for business, industry and the professions.

The University’s program for the educationally and economically disadvantaged has become a model for delivering better learning opportunities to young people and adults traditionally bypassed by higher education. Over the past 30 years almost 482,000 New York State residents have been served through their Educational Opportunity Program and Educational Opportunity Centers.

Thirty-five percent of all New York State high school graduates enroll at a SUNY campus and the University’s total enrollment is approximately 37 percent of all college students in the state.

Although more than 96 percent of SUNY’s undergraduates come from New York State, the rest come from every other state in the nation and from 160 foreign countries. The University recorded a 138.3 percent increase in enrollment of African Americans, Asian Americans, Hispanics and Native Americans from 1976 to 1997.

## Those Who Teach

SUNY is committed to bring to its students the best and brightest faculty, and the promise of a caring learning environment. The SUNY community of teachers and scholars is recruited from the finest graduate schools and universities, and includes nationally and internationally recognized figures in all the major disciplines.

Faculty efforts and accomplishments have been recognized by numerous prestigious awards and honors, including the Nobel Prize, Pulitzer Prize, Guggenheim grants, MacArthur “genius” awards, Sloan, Danforth and Fulbright fellowships, and ACLS awards.

## Meeting Society’s Needs

The University’s future-looking planning process articulated in “SUNY 2000: A Vision for the New Century,” places special emphasis on SUNY as a key player in meeting state needs in health care, public education, economic development, social services and the environment.

As a source of ideas, information, innovation and inventions, SUNY has become essential to the success and growth of New York’s business and industry and to the prosperity of all New Yorkers. Its special mission to the people of New York is to develop the base of research and knowledge on which the state’s economic life depends, and to offer every New York State resident access to the finest public higher education.

SUNY researchers pioneered nuclear magnetic resonance imaging, introduced time-lapse photography of forestry subjects, isolated the bacteria that causes lyme disease, developed the first implantable heart pacemaker and made hundreds of other contributions, inventions and innovations for the benefit of society.

The University’s libraries are the major resource which supports the teaching and research activities of its students and faculty and an important community resource, too. Of the more than 6 million items circulated SUNY-wide last year, over a third of a million were made available to the wider community by lending books to other non-SUNY institutions, including school, business, public and special libraries. The University’s library collection itself now exceeds 20 million volumes of books and other materials.
