OFFICE

The Multicultural Life Office provides culturally enlightening programs with the intent of facilitating an environment in which cultural diversity is both appreciated and supported. It is the hope of this office that members of the SUNY Cortland community will develop a better understanding of all people in our society in general and specifically people of African, Asian, Latino and Native American descent and students who have identified themselves as gay, bisexual, lesbian and transgender.

This office also serves as a primary resource for students of color and strives to ensure that their academic, personal and social needs are fulfilled during their tenure at the College.

The Multicultural Life Office and the Student Support Committee co-sponsor The Challenge for Success Program to honor the outstanding achievements of African, Latino/a, Asian and Native American (ALANA) students and the Kente Cloth ceremony for graduating ALANA seniors to symbolize the importance of family support.

Outdoor Education Facilities

Center for Environmental and
Outdoor Education
Miller Building, Room 230
(607) 753-5488
www.cortland.edu/outdoor/

SUNY Cortland has recognized the value of outdoor and environmental education since the mid-1930s when it began to require physical education students to participate in two-week camping programs as part of their formal training. Opportunities for study and fieldwork in the outdoors have expanded greatly since that time and many of Cortland's academic departments now make use of three adjunct campuses developed by the College to support outdoor and environmental education programs.

Outdoor Education Center at Raquette Lake

Jack C. Sheltmire, Director
P.O. Box 99, Raquette Lake, NY 13436
(315) 354-4784

Antlers: Located on the west side of Raquette Lake, Antlers serves both as a site for conferences and course work as well as a docking area for those embarking to Camp Huntington.

Antlers can accommodate approximately 45 guests. The location offers convenient access to the Adirondack Museum and other sites in the area.

Huntington Memorial Camp: Camp Huntington provides an outstanding natural setting for students to examine most aspects of the environment. This facility can accommodate up to 70 guests. The camp's forests, bogs and ponds serve as natural laboratories for courses in the biological sciences. Raquette Lake provides an elaborate research area in which students examine the unpolluted waters.

Physical education and recreation students make extensive use of the Outdoor Education Center in required and elective courses. Students from all disciplines enjoy opportunities at the Outdoor Education Center to learn how to use the outdoors as a classroom for academic subjects and to learn to develop an appreciation for the outdoor environment.

Hoxie Gorge Nature Preserve

R. Lawrence Klotz, Biological Sciences Department
Bowers Hall, Room 240
(607) 753-2715

Hoxie Gorge Nature Preserve is a 169-acre natural area close to the main campus. It provides many different environments, each with a unique set of characteristics that warrant careful study by the biologist or geologist or treat the casual visitor with a pleasant visual experience. The natural environments include pristine streams running through the gorge area, mature woodlands and old fields. The McDermott Nature Trail provides access to these areas.

Hoxie Gorge provides SUNY Cortland students, faculty and staff with the opportunity for class and individual study, research and enjoyment of the natural environment. Located only seven miles from campus, Hoxie Gorge is easily visited during a two or three hour class period. Approximately 1,000 students per year are involved in academic field study there.

Faculty members and a number of their students have utilized Hoxie Gorge extensively for research purposes. This research has attracted more than \$500,000 in grants and resulted in approximately 30 journal publications. The research topics include insect chemical ecology and behavior, taxonomy of mushrooms, conservation biology of amphibians, pollination biology of flowering plants and nutrient cycling in streams.

Robert C. Brauer Memorial Field Research Station

Jack Sheltmire, Director
Center for Environmental and Outdoor Education
Miller Building, Room 230
(607) 753-5488

SUNY Cortland's Robert C. Brauer Memorial Field Research Station is the only major geological facility in State University of New York. It is located in the town of Bethlehem, eight miles south of Albany and near the famed Helderberg Escarpment — an area known to geologists as a classic region of fossiliferous limestone and shale formations of the Devonian age.

A main building and bunkhouse on the 33-acre tract provide classroom, dining and sleeping accommodations for approximately 36 students. This facility is used by the College's Geology Department as a base for studies of the Catskill Mountains, mid-Hudson Valley and Taconic Range, which offer sections of Lower and Middle Paleozoic carbonate and terrigenous rocks, structurally complex and metamorphic terranes, and widespread Pleistocene landforms and deposits.

The Adirondacks and Berkshires also are accessible from Brauer Field Station for field trips and provide opportunities for examining igneous and high-grade metamorphic rocks of the Precambrian age.

The Brauer Field Station is available for use by other educational institutions and professional organizations. In addition to activities sponsored by the College's admissions and alumni affairs offices, SUNY Cortland and other institutions have used this facility for programs in biology, foreign language and geology.
