

## eLearning – Changing the picture on your Home Page

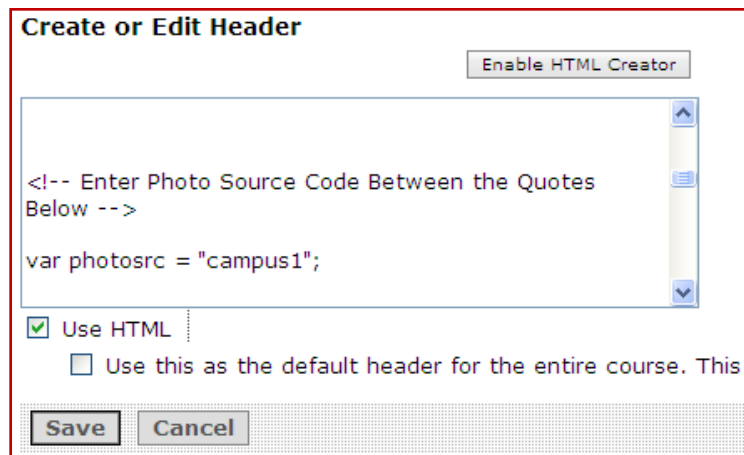

Make sure you are logged into your course and in the Build mode. On the right hand side of the page click on Page Options then on Edit Header:

Scroll down to:

<!-- Enter Photo Source Code Between the Quotes Below -->

```
var photosrc = "campus1";
```

You will change the picture by entering your new code between the “quotation marks” that has the title of the picture. In this case we will take out Campus1 and replace it with the code you have been given. Click on Save.

Please note that you can find some pictures that are ready to be used here:

<http://www.cortland.edu/webct/classroom/images/photos/> but if you have a photo that you want to use PLEASE send it to the eLearning team for editing.
