3 STEPS TO CONNECT:

1 Activate your account

Activate your service before you move in so you're connected the minute you arrive! Sign up instantly online at myresnet.apogeenet.net by **August 8th**. You can choose to pay a flat rate for each semester or for the full academic year in advance. As soon as your account has been created, you will receive a username and password and you will use this to access the Internet when you move in.

For assistance activating your account, call us toll-free at **1(877)478-8804**.

2 Connect to the network

Once your account has been activated, you can start surfing as soon as you arrive. To connect to the network, plug your computer directly into the data jack in the wall using an Ethernet cable. (Be careful not to confuse this with a phone cable, which is similar but smaller in size.) Make sure any bridged connections you have are removed or disabled.

Immediately upon opening your browser window, you will be automatically redirected to a login screen. Enter the username and password you received when you activated your account and you will be instantly connected.

3 Protect your computer

As with any network, there is an element of risk associated with being online. That's why it's important to make sure your computer is up to date with the latest antivirus and spyware control software. Visit myresnet.apogeenet.net for free software downloads and access to articles on using the network safely and legally.

IMPORTANT: Do not share your account username and password with anyone. Your Apogee network account is for use by you and you alone. Sharing your account puts you at risk for serious security and legal issues.

Routers (Ethernet and wireless), access points and other such network devices are prohibited because they cause connection problems and can interfere with the network access of those around you. If you are found to be in violation of this policy, your network access could be suspended.

Please review Apogee's end user service agreement at apogeenet.net/pdf/eua.pdf.
